ABSTRACT: Writing is a critical ability needed for success in school, in the workplace, and in a personal basis writing. Despite its significance, many people find it difficult to write accurately, coherently, and with clarity. This article looks at several methods of developing writing abilities, such as practice exercises, instructional methodologies, and feedback systems. Through an assessment of current literature and real-world implementations, this study pinpoints effective methods for enhancing writing proficiency and offers practical suggestions for both teachers and students.

KEY WORDS: writing skills, explicit instruction in writing processes, genre-based instruction, modeling and scaffolding, regular writing practice, peer review and collaborative writing, writing across the curriculum, feedback mechanisms, self-assessment and reflection, writing portfolio.

ЭФФЕКТИВНЫЕ МЕТОДЫ УЛУЧШЕНИЯ НАВЫКОВ ПИСЬМЕННОСТИ В ВЫСШЕМ ОБРАЗОВАНИИ

АННОТАЦИЯ: Письмо — это критически важный навык, необходимый для успешной учебы, работы и личного общения. Несмотря на его значимость, многим людям трудно писать точно, последовательно и ясно. В этой статье рассматриваются несколько методов развития навыков письма, таких как практические упражнения, методики обучения и системы обратной связи. Путем анализа текущей литературы и реальных примеров, данное исследование выделяет эффективные методы повышения письменной грамотности и предлагает практические рекомендации как для учителей, так и для студентов.

КЛЮЧЕВЫЕ СЛОВА: навыки письма, явное обучение процессам письма, обучение на основе жанров, моделирование и поддержка, регулярная практика письма,

рецензирование сверстников и совместное письмо, письмо в различных предметных областях, механизмы обратной связи, самооценка и рефлексия, портфолио писателя.

OLIV TA'LIMDA YOZISH KO'NIKMALARINI RIVOJLANTIRISHDA YORDAM BERADIGAN SAMARALI USULLAR

ANNOTATSIYA: Yozish — bu maktabda, ish joyida va yozma shaxsiy fikr bildirishda zarur bo'lgan muhim qobiliyatdir. Uning ahamiyatiga qaramay, ko'plab insonlar aniq-ravshan va mantiqiy yozishni qiyin deb baholaydilar. Ushbu maqola yozish qobiliyatlarini rivojlantirishning bir necha usullarini, masalan, amaliy mashqlar, ta'lim texnologiyalari va fikr bildirish tizimlarini ko'rib chiqadi. Berilgan adabiyotlar va real fikrlarni baholash orqali, ushbu maqola, yozish malakasini oshirish uchun samarali usullarni aniqlaydi va o'qituvchilar hamda talabalarga amaliy takliflar beradi.

KALIT SO'ZLAR: Yozish ko'nikmalari, yozish jarayonlariga oid oshkora o'qitish, janrga asoslangan o'qitish, muvaffaqiyatli yozuvni yuzaga chiqarish va qo'llab-quvvatlash, muntazam yozish amaliyoti, birgalikda va sheriklik asosida yozish, o'quv rejalari bo'yicha yozish, fikr bildirish mexanizmlari, o'zini baholash va qayta fikrlash, portfoliyo yozish.

INTRODUCTION. Writing is a critical ability needed for success in school, in the workplace, and in a personal basis writing. Despite its significance, many people find it difficult to write accurately, coherently, and with clarity. This article looks at several methods of developing writing abilities, such as practice exercises, instructional methodologies, and feedback systems. Through an assessment of current literature and real-world implementations, this study pinpoints effective methods for enhancing writing proficiency and offers practical suggestions for both teachers and students.

MATERIALS AND METHODS

Materials

To explore methods for improving writing skills, this study utilized a variety of resources:

✓ **Educational Research Articles:** Recent research into writing pedagogy and instructional strategies.

✓ **Instructional Guides and Textbooks:** Books and manuals that describe excellent writing techniques and procedures.

✓ **Case Studies:** Examples of educational institutions and programs that have effectively utilized writing improvement methodologies.

✓ **Surveys and Feedback:** Data collected from instructors and students on the effectiveness of various writing styles.

Methods

The study employed a qualitative research approach, involving:

1. **Literature Review:** Analyzing scholarly publications and books to identify shared practices and theories in writing teaching.

2. **Case Study Analysis:** Reviewing real-world instances from educational settings where writing enhancement techniques have been used.

3. **Survey Data:** Evaluate comments from teachers and students on the efficacy of various writing strategies.

The methods were categorized into three primary areas:

1. *Instructional Techniques*

2. *Practice Strategies*

3. *Feedback Mechanisms*

RESULTS AND DISCUSSION.

Instructional Techniques

1. Explicit Instruction in Writing Processes

Students that receive explicit training are taught the precise steps involved in writing, including organizing, composing, revising, and editing. This methodical approach aids students in understanding the writing process and develops their skills in a methodical way. Research backs up this method's effectiveness, demonstrating that students who receive detailed, step-by-step instructions on writing procedures do better on writing assignments. [1] The "Writing Workshop" approach, which prioritizes these phases, has led to notable improvements in students' writing proficiency. [2]

1. Genre-Based Instruction

Students who receive genre-based training learn about the characteristics and formats of several types of writing, such as narratives, expository essays, and persuasive articles. Students can adapt their writing for specific audiences and aims by knowing genre norms. Students can become more proficient writers by being able to identify and employ genre-specific elements through explicit instruction on genre characteristics. [3]

2. Modeling and Scaffolding

Through modeling, teachers demonstrate writing concepts and techniques to students. Scaffolding provides support that is gradually removed as students gain proficiency. One strategy to model well is to give examples of outstanding writing and discuss the strategies used. Writing projects ought to be scaffolded, or divided into smaller, easier-to-manage chunks, with assistance offered when required. This approach helps students internalize writing strategies and become more independent writers. [4]

Practice Strategies

1. Regular Writing Practice

It takes constant effort to improve writing abilities. Regular writing assignments let students apply their knowledge and gradually improve their skills. Research indicates that regular practice, such as completing assignments and writing prompts, enhances one's writing confidence and fluency. By encouraging daily or weekly writing tasks, teachers can help students develop and enhance their writing skills.

2. Peer Review and Collaborative Writing

Students work together through peer review and collaborative writing tasks to give and receive feedback on each other's writing. By using these strategies, students can learn from the shortcomings and strengths of their peers and are taught to think critically. Peer review also promotes a deeper comprehension of the writing and editing processes. Peer review has been shown to increase students' motivation and significantly improve their writing quality. [5]

3. Writing Across the Curriculum

Writing assignments are included into several topic areas to encourage writing practice in a variety of situations. Writing assignments integrated into subjects such as physics, history, and mathematics is referred to as "writing across the curriculum." This approach improves writing skills and demonstrates the relevance of writing in a variety of professions. Research supports the effectiveness of writing assignments throughout the school curriculum in enhancing students' overall writing skills. [6]

Feedback Mechanisms

1. Constructive Feedback

It takes constructive feedback to make writing better. Students respond best to feedback that is specific, useful, and focused on helping them find their areas of strength and progress. With comments on a variety of aspects, including content, organization, language use, and style, students can enhance their writing abilities and make notable progress. [7] In order to support students' development, teachers ought to try to give timely, comprehensive feedback.

1. Self-Assessment and Reflection

Encouraging students to analyze and assess themselves can help them become more self-aware and develop the capacity to think critically about their work. Self-assessment involves comparing one's own work to predefined standards, whereas reflection involves assessing one's writing process and growth. Students can improve their metacognitive skills and take ownership of their writing by implementing these techniques. [8]

2. Writing Portfolios

Writing portfolios are collections of drafts, revisions, and finished works that students have created over the course of their academic careers. Portfolios provide a comprehensive overview of a student's writing development and stimulate reflection on areas for growth. According to research, portfolios can boost writing talents by encouraging introspection and long-term analysis of one's own writing development. [9]

CONCLUSION. Improving writing skills involves a multifaceted approach that includes effective teaching techniques, persistent practice, and constructive critique. It has been shown that strategies such as genre-based training, modeling, and explicit instruction in writing processes significantly improve writing ability. Peer review, constant practice, and writing assignments from many topic areas all help to improve writing abilities. Students can also develop their writing skills by utilizing writing portfolios, self-assessment, and constructive feedback. By implementing these tactics, teachers can provide comprehensive aid to students' writing development, resulting in improved writing output.
